

MAINTENANCE EXCHANGE

- Are you tired of spending hours on maintenance administration?
- Are invoice disputes affecting customer relationships and cash flow?
- Are you struggling to keep track of compliance documents?

Introducing Maintenance Exchange - The new maintenance and compliance platform from fleet software innovator Jaama is here and is revolutionising the way information exchanges in real-time between:

- ✓ **Fleet management companies** - businesses managing service, maintenance and repair (SMR) on an outsourced basis on behalf of end-user fleets
- ✓ **Maintenance providers** - franchise dealer networks and independent garages undertaking SMR work
- ✓ **End-user fleets** that outsource maintenance management but require visibility of SMR work undertaken on vehicles and resulting compliance documentation

Maintenance Exchange connects with Key2 - Jaama's award-winning fleet, asset and driver management solution, or can interface with other third party fleet systems. The 'end to end' system allows:

- ✓ Seamless maintenance booking
- ✓ Authorisation of work
- ✓ Invoicing and auditing of vehicle maintenance work

This exciting new platform streamlines the exchange of vehicle maintenance information along with related documentation between maintenance suppliers and fleet management companies/end-user fleets, including:

- ✓ MoT certifications
- ✓ Commercial vehicle inspection sheets
- ✓ Servicing and routine maintenance documents

Gold Application Development

MAINTENANCE EXCHANGE

Increase Efficiency

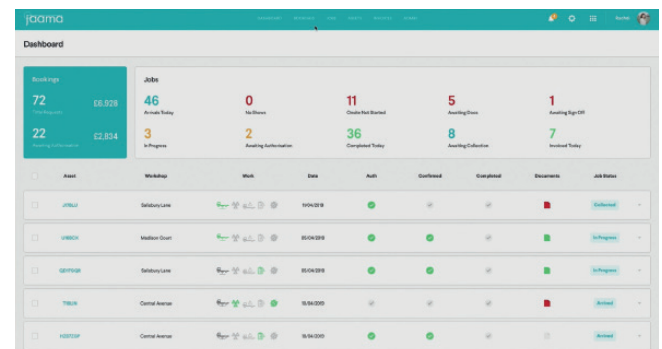

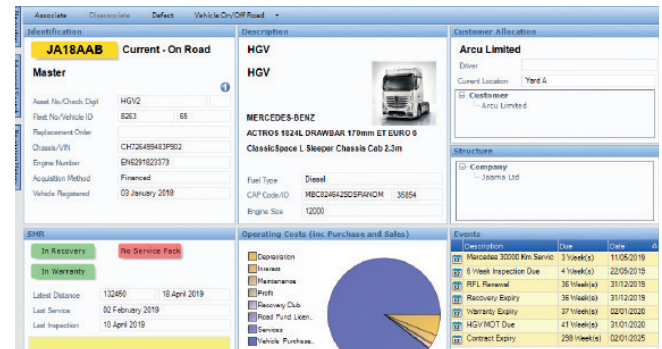

- ✓ Vehicle maintenance work can be electronically authorised through the platform saving valuable time
- ✓ Enables fleets to implement individual service level agreements and rates with their vehicle maintenance suppliers to further streamline services without manual intervention

Reduce Costs

- ✓ Invoices for jobs carried out can be electronically raised and paid online – no need to manually raise and send an invoice
- ✓ Reducing the time consuming administrative burden of manual processes reduces overheads

Stay Compliant

- ✓ Provides transport and fleet operators with a complete audit trail of SMR work undertaken on commercial vehicles for compliance requirements
- ✓ All required documentation typically MoT certifications, vehicle inspection sheets, servicing and routine maintenance documents can be seamlessly shared between service & repair centres, vehicle owners/operators and the DVSA
- ✓ Centralise view of all compliance data and documentation. Can be submitted directly to the DVSA for the Earned Recognition Scheme

What to do next...
