

MAINTENANCE EXCHANGE

Are you tired of spending hours on maintenance administration?
 Are invoice disputes affecting customer relationships and cash flow?
 Are you constantly on the phone requesting authorisation for work?

Maintenance Exchange - The award winning maintenance and compliance platform from fleet software innovator Jaama is here and is revolutionising the way information exchanges in real-time between:

Maintenance Suppliers

Franchise dealer networks and independent garages undertaking SMR work

Fleet Management Companies

Businesses managing service, maintenance and repair (SMR) on an outsourced basis on behalf of end-user fleets

Fleet Operators

Outsource maintenance management. Require visibility of SMR work undertaken on vehicles and resulting compliance documentation

Maintenance Exchange connects with Key2 - Jaama's award-winning fleet, asset and driver management solution, or can interface with other third party fleet systems. The 'end to end' system allows:

- ✓ Seamless maintenance booking
- ✓ Authorisation of work
- ✓ Invoicing and auditing of vehicle maintenance work

This exciting new platform streamlines the exchange of vehicle maintenance information along with related documentation between maintenance suppliers and fleet management companies/end-user fleets, including:

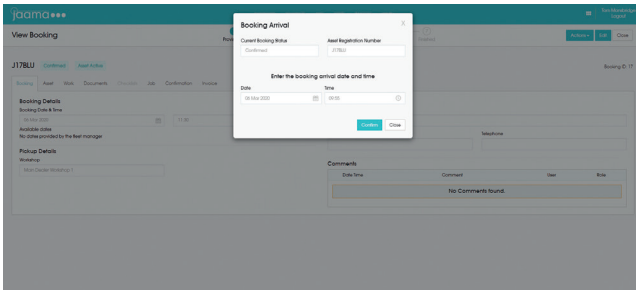

- ✓ MoT certifications
- ✓ Commercial vehicle inspection sheets
- ✓ Servicing and routine maintenance documents

MAINTENANCE EXCHANGE

Reduce Costs

- ✓ No need to manually raise and send an invoice. Invoices for completed jobs, are electronically generated at the touch of a button and submitted directly into the operators' accounts system for prompt payment. This in turn increases cash flow through prompt payments, making the tasks of managing authorisation and payments quicker, slicker with reduced risk of omission or error
- ✓ Reducing the time consuming administrative burden of manual processes reduces overheads

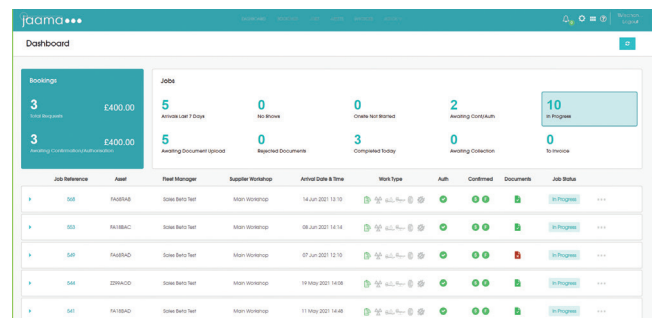

Increase Efficiency

- ✓ Vehicle maintenance work can be electronically authorised through the platform saving valuable time
- ✓ Maintenance Exchange enables garages to implement individual service level agreements and rates with their operators but view all jobs from all operators in one easy to use dashboard
- ✓ Real time access to your complete maintenance schedule for the day. Colour coded items visually highlight the status of the job from booking to completion
- ✓ Jobs cannot be progressed whilst there is outstanding work authorisation is required. This removes the risk of completing work and not getting paid for it

Stay Compliant

- ✓ Digital invoices for jobs carried out can be electronically raised and sent online without the need to manually produce an invoice
- ✓ All required documentation typically MoT certifications, vehicle inspection sheets, servicing and routine maintenance documents can be seamlessly shared between service & repair centres, vehicle owners/operators and the DVSA
- ✓ Vehicle maintenance work can be electronically authorised in a couple of clicks saving time on the phone. Real time communication, and scheduled and automated notifications eradicate further administrative tasks
- ✓ Centralised view of all compliance data and documentation, which can be submitted directly to the DVSA for Earned Recognition Scheme compliance
- ✓ Provides transport and fleet operators with a complete audit trail and history of SMR work undertaken on commercial vehicles for compliance requirements
- ✓ The time consuming administrative burden of manual processes is removed, costs are agreed in advance, jobs are authorised making invoicing errors and late payments a thing of the past
